ABOUT ME: [My Online Portfolio](#)

Analytical and process-driven professional with experience in energy markets, environmental settlements, and business operations. **Skilled in Python, SQL, BI Tools, and Excel**, with a strong foundation in process documentation, quality systems, and continuous improvement.

Originally from Brazil and now based in Sydney, I combine technical analytics expertise with hands-on experience improving systems and automating workflows. I recently completed a **Master of Analytics** at the **University of New South Wales** (Dec 2024) and currently work at Alinta Energy, leading Python automation projects that enhance accuracy, efficiency, and performance across the Treasury and Settlements team.

Curious by nature and driven to solve complex problems, I enjoy surfing, tennis, spending time outdoors, and discovering good coffee — bringing the same focus and energy to both work and life.

KEY POSITIONS

UNSW

Master of Analytics

Completed Dec 2024

Alinta Energy

Analyst, Treasury Operations & Settlements

Full Time

April 2024 – Present, Sydney, NSW – Hybrid

- Manage the end-to-end settlement process for environmental and financial products, including LGCs, STCs, and ACCUs.
- Perform daily reconciliations and validations using **Python, SQL, and advanced Excel** to ensure accuracy and compliance across all trades.
- Build **Power BI** dashboards and automated Excel reports to provide near real-time insights to Finance, Trading, and Risk teams.
- Collaborate closely with traders, brokers, and internal teams to resolve discrepancies, strengthen data integrity, and support audit and compliance requirements.

Key Achievements

- **Led** the development and spearheaded **Python automation initiatives** that streamlined reconciliation workflows, reduced manual effort, and improved settlement speed and accuracy.
- Delivered accurate and timely settlements for complex environmental and financial instruments through cross-department collaboration.

CAREER HISTORY	
Alinta Energy – Analyst - Treasury Operations & Settlements April 2024 – Present, Sydney, NSW – Hybrid	
Career Break - Professional Development	
August 2018 To January 2024	- Relocated from Brazil to Australia in 2018 to pursue further education and professional development. - Earned qualifications in Data Analytics at UNSW and Swinburne University of Technology. - Developed a solid foundation in Python, SQL, and BI tools through coursework and portfolio projects. - Supported my family business in Brazil remotely, handling invoices, payments, and administrative duties. - Worked casually in hospitality and construction while studying, which enhanced my adaptability and teamwork skills. - Gained valuable insights into the Australian business environment before transitioning into the energy sector.
Notarial & Quality Systems Officer - Notary Public	
March 2014 To August 2018 Porto Alegre – Brazil	- Oversaw verification, registration, and validation of legal and financial documents (contracts, debt instruments, certificates). - Led process documentation and internal audits to align operations with ISO 9001 Quality Management standards. - Partnered with IT to modernise digital workflows and reduce manual data errors. - Developed and maintained Standard Operating Procedures (SOPs) and compliance documentation. - Trained staff on new quality and documentation processes, ensuring audit readiness. Key Achievements - Achieved ISO 9001 Certification by leading documentation, auditing, and process improvement initiatives. - Streamlined operational workflows, improving data accuracy and reducing turnaround times. - Recognised for diligence, precision, and reliability in managing confidential legal data.

Every day is an opportunity to improve

Brazilian Armed Forces – Soldier

March 2013 to March
2014, Porto Alegre –
Brazil

- Served full-time in the Brazilian Armed Forces, developing strong discipline, teamwork, and resilience.
- Trained in operations requiring situational awareness, critical thinking, and leadership under pressure.
- Ranked 2nd out of 70 soldiers in performance assessments (physical fitness, tactical, and strategic exercises).
- Awarded a Merit and Honour Certificate for outstanding service and exemplary conduct.
- Built enduring habits of accountability, precision, and teamwork that continue to inform professional performance.

EDUCATION HISTORY

Completed Dec 2024

- Masters in Analytics, University of New South Wales

Completed Dec 2022

- Graduate Certificate of Data Analytics, Swinburne University of Technology
